stefano-casa-full-stack-developer Steve2412

Summary

Computer engineer with experience in the analysis, design and implementation of solutions that optimize business processes and increase operational efficiency. Skilled in software development, database management, network administration and project coordination, with a results-driven approach and a focus on adopting new technologies.

Education

B.Eng. **Universidad Rafael Belloso Chacín**, Computer Engineering — Maracaibo, Venezuela
Training in the full software development lifecycle, databases, web development, software quality, IT project management, systems auditing and artificial intelligence. — Jan 2020 – Jul 2024

B2 **Instituto de Idiomas Alexis Villanueva**, English — Ciudad Ojeda, Venezuela
Fluent communication in professional settings, strong comprehension of technical documentation and clear writing of emails and reports. — May 2019 – Dec 2022

A2 **Centro Integrado para la Enseñanza de Idiomas**, Italian — Ciudad Ojeda, Venezuela
Basic knowledge: understanding and use of everyday expressions, personal introductions and simple interactions. — Sep 2018 – Sep 2019

Experience

Ticvenca, Software Development Intern — Maracaibo, Venezuela
Apr 2024 – Jul 2024
4 months

Developed a vehicle sales management system during my academic internship, applying software analysis, design and implementation methodologies to optimize business processes.

- Designed UML diagrams to model the system architecture
- Built and administered the database in SQL Server
- Developed desktop user interfaces with Windows Forms (WinForms)
- Implemented system features in C#
- Integrated libraries for automatic PDF report generation
- Documented technical processes for future developers

Projects

CambiApp — Apr 2026 – Jun 2026

Currency calculator for Venezuela that provides real-time USD BCV, EUR BCV and USDT P2P rates. Built with Kotlin + Jetpack Compose + Material 3 + Clean Architecture.

- **Real-time rates:** fetches up-to-date data from the BCV and Binance.
- **Fallback system:** if the main API fails, scrapes the BCV website directly to ensure availability.
- **Offline cache:** access to the latest saved rates through Room Database.
- **Home screen widget:** quick rate lookup from the home screen using Jetpack Glance.
- **Automatic updates:** background sync every 2 hours with WorkManager.

Conavenca - Package Shipping Website 2023 – 2024

Comprehensive web application for Conavenca, a package shipping agency. Built with HTML + CSS + JavaScript + PHP + Bootstrap + MySQL.

- **Shipment management:** tracks packages from registration to delivery.
- **Real-time tracking:** package location through map integration.
- **QR codes:** QR code generation to streamline package tracking.
- **Invoicing:** PDF invoice generation.
- **Backups:** database backup creation.

Corblaserca - Online Language Learning Platform 2023

Demo version of a web platform for online language learning. Built with HTML + CSS + JavaScript + PHP + Bootstrap + MySQL.

- **Course management:** administrators manage the language courses.
- **Course forum:** space for communication and collaboration among users.
- **Payment management:** recording and reporting of user payments.
- **PDF reports:** report generation with the DomPDF library.
- **Backups:** SQL backup generation to preserve information.

Icar Play - Inventory Management System 2023

Web application for managing vehicle and spare parts inventory, as well as customer and mechanic information. Built with HTML + CSS + JavaScript + PHP + Bootstrap + MySQL.

- **Vehicle inventory:** detailed records including images, make, model, type, year and classification.
- **Mechanic management:** mechanic records and task assignment.
- **PDF reports:** structured report generation with DomPDF.
- **QR codes:** quick access to information with PHP QR Code.

OCR Mobile App 2023

Android Optical Character Recognition (OCR) app that converts text in images into editable format. Built with Kotlin + Android Studio.

- **Camera capture:** takes pictures directly from the device camera.
- **Gallery selection:** extracts text from saved photos.
- **Text recognition:** converts text in images into editable plain text.
- **Intuitive interface:** smooth and simple navigation throughout the app.

Skills

Frontend: React, HTML5, CSS3 and JavaScript.

Backend: PHP, Node.js, Python and C#.

Mobile: Kotlin, Android, Jetpack Compose and Room.

Databases: MySQL and SQL Server.

Tools: Git, GitHub and AI tools such as Claude Code to streamline the workflow.

Modeling: UML diagrams (use case, class, sequence and entity-relationship).

Testing: Unit, integration and functional testing to ensure software quality, stability and correct operation.

Security: Secure authentication, encryption of sensitive data and protection against common web application vulnerabilities.

Networking: Design and administration of LAN/WAN networks, IP addressing and subnetting, VLANs, routing and switching; DHCP and DNS services, firewalls, VPN and connectivity troubleshooting.
